Sommario/riassunto	This volume presents a comparative, socio-historical study of the Germanic standard languages (Afrikaans, Danish, Dutch, English, Faroese, Frisian, German, Icelandic, Low German, Luxembourgish, Norwegian, Scots, Swedish, Yiddish as well as the Caribbean and Pacific Creole languages). Each of the 16 original chapters systematically discusses central aspects of the standardization process, including

dialect selection, codification, elaboration and diffusion of the standard norm across the speech community, as well as incipient processes of de-standardization and re-standardization.
