

1. Record Nr.	UNINA9910827072703321
Autore	Croft William
Titolo	Ten lectures on construction grammar and typology / / by William Croft
Pubbl/distr/stampa	Leiden ; ; Boston : , : BRILL, , [2021] ©2021
ISBN	90-04-36353-X 9789004363526
Descrizione fisica	IX, 311 p. ; ; 25 cm 1 online resource
Collana	Distinguished lectures in cognitive linguistics ; ; Volume 11
Disciplina	415.018
Soggetti	Construction grammar Linguistic universals
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Disponible en versión en línea e impresa en papel
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	In <i>Ten Lectures on Construction Grammar and Typology</i> , William Croft presents a unified theory of linguistic form and meaning that encompasses crosslinguistic diversity, verbalization and language change. Croft begins from construction grammar, a theory of syntax in which all syntactic structures are a pairing of form and meaning. Constructions are posited as basic; syntactic categories are defined by constructions. The internal structure of constructions directly link elements of constructions to the meanings they express, Constructions across languages can be situated in a space of syntactic variation. Grammar emerges from the verbalization of experience. Constructions occur in a probability distribution across the conceptual space of meanings. These probability distributions evolve, leading to grammatical change in language, modeled in an evolutionary framework.
