Titolo	Atlas of ambulatory EEG // editors, Bernard S. Chang, Steven C. Schachter, Donald L. Schomer
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier Academic Press, c2005
ISBN	1-280-63077-9 9786610630776 0-08-045410-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (118 p.)
Altri autori (Persone)	ChangBernard S SchachterSteven C SchomerDonald L
Disciplina	616.8 616.8047547
Soggetti	Electroencephalography Ambulatory electroencephalography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Acknowledgments; Contributors; Introduction; Chapter 1: A Brief History of Ambulatory EEG; I. Introduction; II. The Rationale for Ambulatory Monitoring; III. Continuous versus Event/Intermittent Recording; IV. Clinical Application; V. Summary; References; Chapter 2: Automated Spike and Seizure Detection Algorithms; I. Introduction; II. Automatic Spike Detection; III. Seizure Detection; IV. Conclusion; References; Chapter 3: The Clinical Use of Ambulatory EEG; I. Purposes of EEG Monitoring; II. Event Monitoring; III. Ambulatory EEG Monitoring IV. Practical and Technical ConsiderationsReferences; Technical Aspects; Technical 1. A Typical Screen or Printed Page of Ambulatory EEG Recording; Technical 2. Left Temporal Seizure: No Filter Used; Technical 3. Left Temporal Seizure: 60-Hz Notch Filter; Technical 4. Left Temporal Seizure: High Frequency 35-Hz Filter; Technical 5. Left Temporal Seizure: High Frequency 15-Hz Filter; Technical 6. Generalized Spike-Wave Activity: Paper Speed 30 Seconds Per Page; Technical 7. Generalized Spike-Wave Activity: Paper Speed 15 Seconds

Per Page; Technical 8. Generalized Spike-Wave Activity: Gain = 2
Technical 9. Generalized Spike-Wave Activity: Gain = 1 Normal Sleep
Morphologies; Normal Sleep 1. Sleep Spindles; Normal Sleep 2. K-
Complexes and Sleep Spindles Recorded by Spike Detection Algorithm;

Recorded by Seizure Detection Algorithm; Epileptiform 8A. Left
Frontotemporal Seizure Recorded by Pushbutton Activation (Page 1 of
2); Epileptiform 8B. Left Frontotemporal Seizure Recorded by
Pushbutton Activation (Page 2 of 2); Epileptiform 9. Frontal Onset
Epileptiform Activity Recorded by Seizure Detection Algorithm
Epileptiform 10A. Right Mesial Temporal Seizure Recorded by
Pushbutton Activation (Page 1 of 2)

Sommario/riassunto

Atlas of Ambulatory EEG is a first-of-its-kind publication in clinical neurophysiology, an atlas that comprehensively depicts normal, abnormal, and artifactual findings from actual ambulatory EEG recordings in a convenient and easily accessible format. As the use of ambulatory EEG has increased in recent years, the need for a concise atlas of ambulatory EEG has grown significantly, since ambulatory EEG tracings are subject to their own unique issues and artifacts, often not discussed in standard EEG atlases. This book begins with several chapters that introduce the history, technology
