The Profession and Law Schools That Emerge Will Be Stronger and Better""; ""13. Conclusion""; ""Notes""; ""Index""
Sommario/riassunto	The hits keep coming for the American legal profession. Law schools are churning out too many graduates, depressing wages, and constricting the hiring market. Big Law firms are crumbling, as the relentless pursuit of profits corrodes their core business model. Modern technology can now handle routine legal tasks like drafting incorporation papers and wills, reducing the need to hire lawyers; tort

reform and other regulations on litigation have had the same effect. As in all areas of today's economy, there are some big winners; the rest struggle to find work, or decide to leave the field altogether
