Sommario/riassunto

Growth and Change in Neoliberal Capitalism brings together selected essays written by Alfredo Saad-Filho, one of the most prominent Marxist political economists today. This book offers a rich analysis of long-term economic development in the current stage of capitalism, the new relations of dependence between countries, the prospects for poor countries, and the progressive alternatives to neoliberalism. The volume also provides a detailed set of studies of the political economy of Brazil, tracking its achievements, tragedies, contradictions and limitations from the economic transition to from import-substituting industrialisation to neoliberalism, and from military dictatorship to democracy, in order to explain the catastrophes currently unfolding in that country.
