Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The historical counties of Cheshire, Lancashire, Westmorland and Cumberland have a rich diversity of geology, landscape, vegetation and wildlife. This is an account of a group of fascinating fungi, the downy and powdery mildews. They belong to quite different groups of fungi, in the broadest sense, and are important parasites on flowering plants.
