

1. Record Nr.	UNINA9910827241103321
Titolo	Polycystic kidney disease : from bench to bedside // editors, Vincent H. Gattone, Robert L. Bacall
Pubbl/distr/stampa	London, England : , : Future Medicine Ltd., , [2013] ©2013
ISBN	1-78084-174-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (195 p.)
Disciplina	616.61042
Soggetti	Polycystic kidney disease Polycystic kidney disease - Diagnosis Polycystic kidney disease - Treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Title page; Copyright page; Contents; Foreword. Polycystic kidney disease: from bench to bedside; 1. Polycystic kidney disease: genes, prevalence and diagnosis; 2. Polycystins and the pathophysiology of autosomal dominant polycystic kidney disease; 3. Fibrocystin/polyductin and pathophysiology of autosomal recessive polycystic kidney disease; 4. Nephronophthisis; 5. Meckel syndrome; 6. The Bardet-Biedl and orofacial digital type I ciliopathies; 7. Pain and pain management in polycystic kidney disease; 8. Hypertension in autosomal dominant polycystic kidney disease 9. Complications of polycystic kidney disease 10. End-stage renal disease in polycystic kidney disease; 11. Preclinical and clinical trials for identifying treatments for polycystic kidney disease; Index
Sommario/riassunto	Recent years have seen advances in our understanding the molecular cell biology, signaling and pathogenesis of one of the most common life-threatening genetic diseases - polycystic kidney disease (PKD). This multichapter work from international experts opens with chapters exploring the pathogenesis and pathophysiology of autosomal dominant and autosomal recessive PKD.
