Sommario/riassunto

The Far Northeast, a peninsula incorporating the six New England states, New York east of the Hudson, Quebec south of the St. Lawrence River and Gulf of St. Lawrence, and the Maritime Provinces, provided the setting for a distinct chapter in the peopling of North America. Late Pleistocene Archaeology and Ecology in the Far Northeast focuses on the Clovis pioneers and their eastward migration into this region, inhospitable before 13,500 years ago, especially in its northern latitudes.
