

1. Record Nr.	UNINA9910827296803321
Autore	Kawase Seiichirao
Titolo	Radio interferometry and satellite tracking // Seiichiro Kawase
Pubbl/distr/stampa	Norwood, Massachusetts : , : Artech House, , ©2012 [Piscataway, New Jersey] : , : IEEE Xplore, , [2012]
ISBN	1-60807-097-2
Descrizione fisica	1 online resource (257 p.)
Collana	Artech House space technology and applications library
Disciplina	621.38238
Soggetti	Artificial satellites - Tracking Radio interferometers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Radio interferometer -- pt. 2. Geostationary satellite orbit -- pt. 3. Interferometric tracking.
Sommario/riassunto	Worldwide growth of space communications has caused a rapid increase in the number of satellites operating in geostationary orbits, causing overcrowded orbits. This practical resource is designed to help professionals overcome this problem. This timely book provides a solid understanding of the use of radio interferometers for tracking and monitoring satellites in overcrowded environments. Practitioners learn the fundamentals of radio interferometer hardware, including antennas, receiving equipment, signal processing and phase detection, and measurement accuracies. This in-depth volume describ.
