Sommario/riassunto	Many of the current debates about validity in psychiatry and psychology are predicated on the unexpected failure to validate commonly used diagnostic categories. The recognition of this failure has resulted in, what Thomas Kuhn calls, a period of extraordinary science in which validation problems are given increased weight, alternatives are proposed, methodologies are debated, and philosophical and historical analyses are seen as more relevant than usual. In this important new book in the IPPP series, a group of leading thinkers in psychiatry, psychology, and philosophy offer alternative persp
