

1. Record Nr.	UNINA9910794825803321
Titolo	New worlds, new horizons : a midterm assessment / / Committee on the Review of Progress Toward the Decadal Survey Vision in New Worlds, New Horizons in Astronomy and Astrophysics
Pubbl/distr/stampa	Washington, District of Columbia : , : National Academies Press, , 2016 ©2016
ISBN	0-309-44513-2 0-309-44511-6
Descrizione fisica	1 online resource (139 pages) : illustrations, tables
Disciplina	520.72
Soggetti	Astronomy - Research - Forecasting Astrophysics - Research - Forecasting
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Summary -- Scientific discoveries and technical advances -- Programmatic context -- Progress toward NWNH goals, ground-based program -- Progress toward NWNH goals, space-based program -- The next decadal survey of astronomy and astrophysics -- Appendix A: Statement of task -- Appendix B: Letter of request -- Appendix C: Acronyms -- Appendix D: Biographies of committee members and staff.
Sommario/riassunto	"New Worlds, New Horizons in Astronomy and Astrophysics (NWNH), the report of the 2010 decadal survey of astronomy and astrophysics, put forward a vision for a decade of transformative exploration at the frontiers of astrophysics. This vision included mapping the first stars and galaxies as they emerge from the collapse of dark matter and cold clumps of hydrogen, finding new worlds in a startlingly diverse population of extrasolar planets, and exploiting the vastness and extreme conditions of the universe to reveal new information about the fundamental laws of nature. NWNH outlined a compelling program for understanding the cosmic order and for opening new fields of inquiry through the discovery areas of gravitational waves, time-domain astronomy, and habitable planets. Many of these discoveries are likely

to be enabled by cyber-discovery and the power of mathematics, physics, and imagination. To help realize this vision, NWNH recommended a suite of innovative and powerful facilities, along with balanced, strong support for the scientific community engaged in theory, data analysis, technology development, and measurements with existing and new instrumentation. Already in the first half of the decade, scientists and teams of scientists working with these cutting-edge instruments and with new capabilities in data collection and analysis have made spectacular discoveries that advance the NWNH vision. New Worlds, New Horizons: A Midterm Assessment reviews the responses of NASA's Astrophysics program, NSF's Astronomy program, and DOE's Cosmic Frontiers program to NWNH. This report describes the most significant scientific discoveries, technical advances, and relevant programmatic changes in astronomy and astrophysics over the years since the publication of the decadal survey, and assesses how well the Agencies' programs address the strategies, goals, and priorities outlined in the 2010 decadal survey"--Publisher's description.

2. Record Nr.	UNINA9910827384303321
Autore	Fulton Thomas (Thomas Chandler)
Titolo	The book of books : Biblical interpretation, literary culture, and the political imagination from Erasmus to Milton / / Thomas Fulton
Pubbl/distr/stampa	Philadelphia : , : University of Pennsylvania Press, , [2021] Â©2021
ISBN	0-8122-9766-0
Descrizione fisica	1 online resource (385 pages)
Disciplina	820.9003
Soggetti	English literature - Early modern, 1500-1700 - History and criticism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Contents -- A note on texts -- Introduction -- Chapter 1 Erasmus's New Testament and the Politics of Historicism -- Chapter 2 Tyndale's Literalism and the Laws of Moses -- Chapter 3 A New Josiah and Bucer's Theocratic Utopia -- Chapter 4 The Word in Exile

[The Geneva Bible and Its Readers -- Chapter 5 Battling Bibles and Spenser's Dragon](#) -- [Chapter 6 Measure for Measure and the New King](#) -- [Chapter 7 Milton's Bible and Revolutionary Psalm Culture](#) -- [Chapter 8 Milton Contra Tyndale](#) -- [Coda Legitimating Power](#) -- [Notes](#) -- [Bibliography](#) -- [Biblical Index](#) -- [General Index](#) -- [Acknowledgments](#)

Sommario/riassunto

Just as the Reformation was a movement of intertwined theological and political aims, many individual authors of the time shifted back and forth between biblical interpretation and political writing. Two foundational figures in the history of the Renaissance Bible, Desiderius Erasmus and William Tyndale, are cases in point, one writing in Latin, the other in the vernacular. Erasmus undertook the project of retranslating and annotating the New Testament at the same time that he developed rhetorical approaches for addressing princes in his *Education of a Christian Prince* (1516); Tyndale was occupied with biblically inflected works such as his *Obedience of a Christian Man* (1528) while translating and annotating the first printed English Bibles. In *The Book of Books*, Thomas Fulton charts the process of recovery, interpretation, and reuse of scripture in early modern England, exploring the uses of the Bible as a supremely authoritative text that was continually transformed for political purposes. In a series of case studies linked to biblical translation, polemical tracts, and works of imaginative literature produced during the reigns of successive English rulers, he investigates the commerce between biblical interpretation, readership, and literary culture. Whereas scholars have often drawn exclusively on modern editions of the King James Version, Fulton turns our attention toward the specific Bibles that writers used and the specific manner in which they used them. In doing so, he argues that Spenser, Shakespeare, Milton, and others were in conversation not just with the biblical text itself, but with the rich interpretive and paratextual structures that accompanied it, revolving around sites of social controversy as well as the larger, often dynastically oriented conditions under which particular Bibles were created.
