Sommario/riassunto	Housewives constitute a large section of the population, yet they have received very little attention, let alone respect. Glenna Matthews, who herself spent many years as ""just a housewife"" before becoming a scholar of American history, sets out to redress this imbalance. While the male world of work has always received the most respect, Matthews maintains that widespread reverence for the home prevailed in the nineteenth century. The early stages of industrialization made possible a strong tradition of cooking, baking, and sewing that gave women

Sommario/riassunto	Interactions between nucleic acids and proteins are essential requirements for the viability of cellular life because they are indispensable for many basic biological processes. DNA is typically presented as a specific double-stranded helical structure, but nucleic acids have great structural flexibility. Current knowledge demonstrates that the structural conformations of nucleic acids play critical roles in protein-DNA interactions. This book presents a collection of research findings published in the Special Issue of the International Journal of Molecular Sciences, titled "Impacts of Molecular Structure on Nucleic Acid-Protein Interactions".

Sommario/riassunto	By looking at state-sponsored memory projects, such as memorials, commemorations, and historical museums, this book reveals that the East German communist regime obsessively monitored and attempted to control public representations of the past to legitimize its rule. It demonstrates that the regime's approach to memory politics was not stagnant, but rather evolved over time to meet different demands and potential threats to its legitimacy. Ultimately the party found it increasingly difficult to control the public portrayal of the past, and some dissidents were able to turn the party's memory
