Soggetti	Copper industry and trade - Zambia Zambia Economic conditions 1964-
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Acknowledgments; Abbreviations; Map of Zambia; International Copper Prices-Figures; Contributors; 1 Introduction: Boom and Bust on the Zambian Copperbelt; 2 Historical Perspectives on Zambia's Mining Booms and Busts; 3 The Economics of the Copper Price Boom in Zambia; 4 From Boom to Bust: Diversity and Regulation in Zambia's Privatized Copper Sector; 5 Raw Encounters: Chinese Managers, African Workers, and the Politics of Casualization in Africa's Chinese Enclaves; 6 African Miners and Shape-Shifting Capital Flight: The Case of Luanshya/Baluba 7 Contesting Illegality: Women in the Informal Copper Business 8 The Mining Boom, Capital, and Chiefs in the "New Copperbelt"; 9 Conclusion: Mining, Dispossession, and Transformation in Africa; Bibliography; Index
Sommario/riassunto	"This book aims to understand Zambia's renowned Copperbelt region within a broad historical context and revive the tradition of scholarship that places Zambian experiences within a global perspective"-- "This book paints a vivid picture of Zambia's experience riding the copper price rollercoaster. It brings together the best of recent research on Zambia's mining industry from eminent scholars in history,

geography, anthropology, politics, sociology and economics. The authors discuss how aid donors pressed Zambia to privatize its key industry and how multinational mining houses took advantage of tax-breaks and lax regulation. It considers the opportunities and dangers presented by Chinese investment, how both companies and the Zambian state responded to dramatic instabilities in global commodity markets since 2004, and how frustration with the courting of mining multinationals has led to the rise of populist opposition. This detailed study of a key industry in a poor Central African state tells us a great deal about the unstable nature and uneven impacts of the whole global economic system"--
