

1. Record Nr.	UNINA9910827575003321
Titolo	New directions for biosciences research in agriculture : high-reward opportunities // Committee on Biosciences Research and Agriculture, Board on Agriculture, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1985
ISBN	1-280-22233-6 9786610222339 0-309-56433-6 0-585-15566-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (136 p.)
Disciplina	630/.72073
Soggetti	Agriculture - Research - United States Biology - Research - United States Genetic engineering - Research - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	New Directions for Biosciences Research in Agriculture -- Copyright -- Preface -- Acknowledgments -- Contents -- Executive Summary -- SETTING PRIORITIES -- RESEARCH IN THE BIOSCIENCES -- Genetic Engineering -- Food Animals -- Disease -- Growth and Metabolism -- Development and Reproduction -- Crops -- Carbon and Nitrogen Input -- Growth and Development -- Physicochemical Stress -- Plant Diseases and Insect Pests -- Plant-Pathogen Interactions -- Biological Control -- Insect Neurobiology -- Pesticides -- OPTIMAL CLIMATE FOR BASIC RESEARCH -- Periodic Outside Review -- Leadership -- Ars Centers -- Staff and Activities -- Budget Flexibility -- Outside Relationships -- 1 Introduction -- 2 Molecular Genetics and Genetic Engineering -- STRUCTURE, ORGANIZATION, AND EXPRESSION OF GENES -- ISOLATION -- Cloning -- Transfer -- Expression -- OPPORTUNITIES IN THE PLANT SCIENCES -- Gene Isolation -- Gene Transfer -- Plasmids as Vectors -- Transposable Elements as Vectors -- Viruses as Vectors -- Other Vectors: Microinjection and Direct DNA Uptake -- Cell Culture and Plant Regeneration -- Gene Expression --

Effect of Location on Gene Expression -- Regulatory Sequences --  
Transient Expression Assays -- Multiple Gene Traits -- Research Status  
-- ASPECTS OF MOLECULAR GENETICS OF FOOD ANIMALS -- Gene  
Transfer -- Microinjection into the Germ Line -- Retroviral-based  
Vectors -- Other Vectors -- Gene Identification and Cross Cloning --  
Gene Expression -- Research Status -- POTENTIAL IMPACT ON U.S.  
AGRICULTURE -- 3 Animal Science -- MOLECULAR BASIS OF DISEASE --  
Genes Regulating the Immune Response -- Major Histocompatibility  
Complex -- Lymphocyte Hormones -- Antibodies -- Pathogens and  
Vectors -- Disease Control -- Molecular Diagnostics -- Therapeutic  
Agents -- Research Status -- MOLECULAR BASIS FOR METABOLIC  
REGULATION.  
Characterization of Endogenous Chemical Mediators -- Metabolic  
Control and Function of Cells -- Factors Influencing Intake and  
Digestion -- Research Status -- DEVELOPMENTAL BIOLOGY AND  
REPRODUCTION -- Differentiation -- In Vitro Manipulation of Gametes  
and Embryos -- Addition of Genetic Information to Embryos --  
Reproductive Efficiency -- Research Status -- 4 Plant Science --  
CARBON AND NITROGEN INPUT FOR PLANT GROWTH -- Photosynthesis  
-- Chloroplast Functions -- Carbon Fixation -- Photosynthetic  
Efficiency -- Harvest Index -- Nitrogen Metabolism -- Biological  
Nitrogen Fixation -- Improving Symbiotic Nitrogen Fixation -- Host  
Plant Improvement -- Other Aspects of Nitrogen Metabolism --  
Essential Amino Acids -- Nitrates and Nitrites -- Fertilizer Nitrogen  
Losses -- Research Status -- REGULATION OF PLANT GROWTH AND  
DEVELOPMENT -- Biosynthetic Pathways -- Chemical Analysis --  
Genetic Variants -- Gene Expression -- Photomorphogenesis -- Cell  
Culture and Plant Regeneration -- Research Status --  
PHYSICOCHEMICAL STRESS -- Plant Responses to Stress Factors --  
Drought -- Salinity -- Low Temperature -- High Temperature --  
Stress-Tolerance Mechanisms -- Research Status -- 5 Plant Diseases  
and Insect Pests -- MOLECULAR BASES OF PLANT-PATHOGEN  
INTERACTIONS -- Molecular Determinants of Resistance and  
Susceptibility -- Genetics -- Gene Products -- Gene Structure -- Gene  
Transfer -- MOLECULAR BASIS OF CELLULAR DAMAGE IN SUSCEPTIBLE  
HOSTS -- Mode of Action of Toxins -- Nucleic Acid Interactions --  
Bacterial Interactions -- Research Status -- MODIFICATION OF  
MICROORGANISMS FOR BIOLOGICAL CONTROL AND ORGANIC  
PESTICIDE DISPOSAL -- Microbial Agents for Biological Control --  
Control of Pathogens -- Control of Insect Pests -- Control of  
Nematodes -- Plant Health Microorganisms -- Biological Degradation  
of Organic Pesticides -- Research Status.  
MOLECULAR BASIS OF PESTICIDE ACTION -- Research Status -- INSECT  
NEUROBIOLOGY AND THE REGULATION OF DEVELOPMENT AND  
REPRODUCTION -- Insect Neurobiology -- Endocrine Regulation of  
Metamorphosis, Diapause, and Reproduction -- Research Status -- 6  
The Optimal Climate for Basic Research -- INTRODUCTION --  
RECOMMENDATIONS -- Periodic Outside Review -- Leadership --  
National Program Staff -- New Centers -- Interdisciplinary Activities --  
Consolidation -- Leveraging -- Postdoctoral Program -- Appointment  
of New Staff -- Budget -- Support Staff -- Sabbaticals/Retraining --  
Scientific Meeting Attendance -- Publications -- University  
Relationships -- Industry Relationships -- Public Relations --  
CONCLUSION -- Appendix -- AGRICULTURAL RESEARCH SERVICE  
LABORATORY GROUPS VISITED.
