Sommario/riassunto

"Language is now understood as a key component of cultural identity, but discourses on linguistic nationalism are only a few centuries old. In *Irresistible Signs*, Paola Gambarota investigates the connection between Italian language and national identity over four hundred years, from late-Renaissance linguistic theories to nineteenth-century nationalist myths. Challenging the consensus that linguistic nationalism originated with nineteenth century German philosophers, *Irresistible Signs* advances a more nuanced theory of how culture and language become inextricably linked through literary and rhetorical elements. Gambarota combines Anglo-American theories of the nation with the most advanced Italian scholarship on language ideology and delves into ideas from Giambattista Vico, Giacomo Leopardi, and Melchiorre Cesarotti. *Irresistible Signs* also explores how images of national communities are represented within vernaculars, affirming their influence in shaping contemporary models of monolingual nationhood."
