

1. Record Nr.	UNINA9910827661803321
Titolo	Bulk collection of signals intelligence : technical options / / National Research Council
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2015 ©2015
ISBN	0-309-32523-4 0-309-32521-8
Descrizione fisica	1 online resource (124 pages) : illustrations
Disciplina	342.730858
Soggetti	Electronic intelligence - United States Electronic intelligence - United States - Evaluation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Introduction and Background -- Basic Concepts -- Use Cases and Use Case Categories -- Bulk Collection -- Controlling Usage of Collected Data -- Looking to the Future -- Appendix A: Observations about the Charge to the Committee -- Appendix B: Acronyms -- Appendix C: Biographical Information for Committee Members, Consultants, and Staff
Sommario/riassunto	"The Bulk Collection of Signals Intelligence: Technical Options study is a result of an activity called for in Presidential Policy Directive 28 (PPD-28), issued by President Obama in January 2014, to evaluate U.S. signals intelligence practices. The directive instructed the Office of the Director of National Intelligence (ODNI) to produce a report within one year "assessing the feasibility of creating software that would allow the intelligence community more easily to conduct targeted information acquisition rather than bulk collection." ODNI asked the National Research Council (NRC) -- the operating arm of the National Academy of Sciences and National Academy of Engineering -- to conduct a study, which began in June 2014, to assist in preparing a response to the President. Over the ensuing months, a committee of experts appointed by the Research Council produced the report."--
