Soggetti	Plants - Effect of ultraviolet radiation on Plant cells and tissues Cell death Cytology - Research - Methodology Ultraviolet radiation - Instruments Nitric oxide
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Title page; Preface; List of Contributors; Photo of All the Participants; Contents; Instrumentation and Ecological Aspects; Effects of UV Radiation; Nitric Oxide and Plant Stress; Plant Stress and Programmed Cell Death; Subject Index; Author Index
Sommario/riassunto	Cellular processes, signaled by UV radiation, contribute to the behavior of plants under various stresses in the environment. This book aims to introduce developments and instrumentation for cell biology, to update

our understanding of the effects of UV radiation, and to evaluate how plants use UV signals to protect against damage.
