Sommario/riassunto	"Fully updated to include diagnostic criteria of the DSM-5, The Psychotherapy Documentation Primer, 4th Edition is designed to teach documental skills for the course of psychotherapy from the initial interview to the discharge. The documentation principles discussed in the text satisfy the often-rigid requirements of third-party insurance companies, regulating agencies, mental health licensing boards, and federal HIPAA regulations. More importantly, it provides students and professionals with the empirical and succinct documentation techniques and skills that will allow them to provide clear evidence of the effects of mental health treatment while also reducing the amount of their time spent on paperwork"--
