Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. The color and shape of a cyberspatial world -- pt. II. Homo-Cybericus-- genus and species.
Sommario/riassunto	Ethnopolitics in Cyberspace examines the central role of the Internet in shaping national identity among stateless nations and national minorities in the twenty-first century. By creating new spaces for political discourse, alternative avenues for cultural production, and novel means of social organization, the author argues that the Web is remaking what it means to be part of nation.
