

1. Record Nr.	UNINA990001793410403321
Autore	Raineri, Valter
Titolo	Lepidoptera Thyridoidea, Lasiocampoidea, Bombycoidea. Lepidoptera Hesperioidae, Papilioidea. Lepidoptera Drepanoidea, Axioidea, Geometroidea. Lepidoptera Noctuoidea / Valter Raineri, Sergio Zangheri, Alberto Zilli ... [et al.]
Pubbl/distr/stampa	Bologna : Calderini, 1995
Descrizione fisica	1 v. (paginazione varia) ; 24 cm
Collana	Checklist delle specie della fauna italiana ; 88-91
Altri autori (Persone)	Zangheri, Sergio <1926- > Zilli, Alberto
Disciplina	591.945
Locazione	FAGBC
Collocazione	60 591.945 FAUITA 1995 (088-091)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	La pubblicazione comprende quattro fascicoli con paginazione propria

2. Record Nr.	UNINA9910827844503321
Titolo	Fostering independence, participation, and healthy aging through technology : workshop summary / / Tracy A. Lustig and Steve Olson, Rapporteurs ; Forum on Aging, Disability, and Independence ; Board on Health Sciences Policy ; Division of Behavioral and Social Sciences and Education, Institute of Medicine and National Research Council of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : National Academies Press, , [2013] ©2013
ISBN	0-309-28520-8 0-309-28518-6
Descrizione fisica	1 online resource (84 p.)
Disciplina	618.9703
Soggetti	Technology and older people - Health aspects Technology and older people - Social aspects Aging - Health aspects Aging - Social aspects Older people - Health and hygiene Autonomy - Health aspects Autonomy - Social aspects Social participation - Health aspects Social participation - Social aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Summary of a workshop held by the Forum on Aging, Disability, and Independence on December 19, 2012 in Washington, D.C. titled Fostering Independence, Participation, and Healthy Aging Through Technology--Cf. p. 3.
Nota di bibliografia	Includes bibliographical references (pages 57-58).

Part 1: Incidental Findings of the Brain and Cranium -- 1. Benign Enlargement of the Subarachnoid Spaces and Subdural Collections -- 2. Intracranial Calcifications -- 3. Intracranial Arachnoid Cysts -- 4. Choroid Plexus Cyst -- 5. Choroidal Fissure Cyst -- 6. Dermoid and Epidermoid Cyst -- 7. Incidental Brain Tumors -- 8. Unruptured Incidental Intracranial Aneurysms -- 9. Incidental Cavernous Malformations -- 10. Incidental Intracranial Arterial Dolicoectasia -- 11. Incidental Benign Developmental Venous Anomaly -- 12. Incidental Intracranial Large Vessel Occlusion -- 13. Pituitary Abnormalities -- 14. Pineal Cysts -- 15. Chiari Malformation -- 16. Agenesis of Corpus

Callosum -- 17. Dandy Walker Variant -- 18. Subdural Hematoma -- 19. Asymptomatic Craniofacial Fibrous Dysplasia -- 20. Incidental Lacunar and Cortical Infarcts -- 21. Incidental Intracranial Lipoma -- . Part 2: Incidental Findings of the Spine, Spinal Cord and Spinal Nerves -- 22. Spinal Arachnoid Cysts -- 23. Lipoma of the Filum Terminale -- 24. Incidental Spinal Cysts of Lumbosacral Region -- 25. Incidental Spinal Tumors -- 26. Incidental Spinal Vascular Malformations -- 27. Asymptomatic Hydromyelia and Syringomyelia -- 28. Intraspinal Lipoma -- . Part 3: Incidental Findings of the Craniovertebral Junction, and Spinal Nerves and Peripheral Nerves -- 29. Incidental Atlantoaxial Dislocation -- 30. Incidentalomas of Spine & Peripheral Nervous System -- . Part 4: Others -- 31. Acquired Incidental Findings of the Brain and Spine -- 32. Incidental Lesions of the Brain with Potential Clinical Implications in Psychiatry -- 33. Medicolegal and Ethical Aspects of Incidental Neurological Findings -- . CONCLUSIONS. Subject Index.

Sommario/riassunto

Written and edited by leading international authorities in the field, this book provides an in-depth review of knowledge of the incidental findings of the nervous system, with emphasis on asymptomatic brain and spinal lesions that have the potential to cause illness. It includes very informative chapters, organized into four main groups: first, incidental findings of the brain and cranium, including intracranial, intraventricular and skull base lesions, infarcts and calcification; secondly, incidental findings of the spine and spinal cord, including spinal cord tumors, syringomyelia, arteriovenous malformations and cranivertebral junction anomalies; thirdly, incidental findings of the spinal nerves and peripheral nerves, including tumors of the plexi and peripheral nerves; and fourthly, other lesions, including acquired incidental lesions of the brain and spine as well as the medicolegal and psychiatric aspects related to these lesions. The uniqueness of this compilation lies in the fact that several abnormalities exist in the nervous system that have the potential to cause life threatening illness; yet because they are asymptomatic and incidental, this leads to major management dilemmas related to whether or not to surgically the lesion. The proponents of an early surgical management subscribe to the philosophy that getting rid of an entity earlier on when it is asymptomatic, leads to an early cure and obviates any risk of it becoming aggressive and incurable later on; those opting for a 'wait and watch' policy subscribe to the view that no intervention (as well as subjecting the patient to the risk of surgery) is mandated until the lesion becomes symptomatic. This may subject a person to a lifetime of anxiety related to how that lesion is going to evolve, when in all likelihood, the subject may remain asymptomatic throughout his/her life. The psychological aspects of the patient who is extremely disturbed by the presence of this incidental lesion; and, who cannot adjust to the reality that the treating doctor actually does not have a well-defined plan for it, are issues that are adequately addressed with clinical illustrations and examples. This comprehensive reference book will be an ideal source for neuroscientists at all levels, from graduate students to researchers in specific disciplines studying this region, including neurosurgeons, neurologists, neuroradiologists, neuropathologists and psychiatrists, who seek both basic and more advanced information regarding the incidental findings of the nervous system.
