

1. Record Nr.	UNINA9910827880703321
Titolo	Blood cells and vessel walls : functional interactions : in honour of Dr. J. L. Gowans, FRS
Pubbl/distr/stampa	Amsterdam ; ; New York : , : Excerpta Medica, , 1980
ISBN	9786613694263 9781280783876 1280783877 9780470720547 0470720549 9780470718223 0470718226
Edizione	[1st ed.]
Descrizione fisica	1 online resource (372 pages) : illustrations
Collana	Ciba Foundation symposium ; ; 71 (new ser.)
Altri autori (Persone)	GowansJ. L
Disciplina	591.1/1
Soggetti	Blood cells Vascular endothelium Blood-vessels
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Blood Cells and Vessel Walls: functional interactions; Contents; Chairman's introduction; The haemopoietic microenvironment of bone marrow: an ultrastructural study of the interactions of blood cells, stroma and blood vessels; Discussion; Immunoelectron-microscopic characterization of lymphoid microenvironments in the lymph node and thymus; Discussion; Structural and functional differentiation of microvascular endothelium; Discussion; Haemodynamic and biochemical interactions in intravascular platelet aggregation; Discussion; Prostacyclin; Discussion; General Discussion I Endothelial products; Ia antigens; Permeability of small vessels to cells; The function and pathways of lymphocyte recirculation; Discussion; Reassortment of cell populations within the lymphoid apparatus of the sheep; Discussion; Lymphocyte recirculation in the sheep fetus; Discussion; Lymphocyte traffic through lymph nodes during cell shutdown; Discussion; Effect of skin painting with oxazolone on the

local extravasation of mononuclear cells in sheep; Discussion;  
Metabolic studies of high-walled endothelium of postcapillary venules  
in rat lymph nodes; Discussion; General Discussion II  
Adherence of lymphocytes to the high endothelium of lymph nodes in  
vitro; Discussion; Cellular, genetic and evolutionary aspects of  
lymphocyte interactions with high-endothelial venules; Discussion;  
Macrophages and the differential migration of lymphocytes; Discussion;  
Polymorphonuclear leucocyte chemotaxis: detection of the gradient and  
development of cell polarity; Discussion; Dynamic theory of leucocyte  
adhesion; Discussion; Final General Discussion 'Receptors' and  
adhesion; Summing up; Epilogue; Index to contributors; Subject index

---

## Sommario/riassunto

The Novartis Foundation Series is a popular collection of the  
proceedings from Novartis Foundation Symposia, in which groups of  
leading scientists from a range of topics across biology, chemistry and  
medicine assembled to present papers and discuss results. The  
Novartis Foundation, originally known as the Ciba Foundation, is well  
known to scientists and clinicians around the world.
