Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [260]-263) and index.
Nota di contenuto	1. Thinking into feeling : the person -- 2. Jung's psychological model -- 3. Jung and Fordham -- 4. The self in infancy and childhood : pioneering discoveries -- 5. Ego development in infancy and childhood : the integration of observational research -- 6. Archetypes : their biological basis and actions of the self -- 7. Autism : a disorder of the self -- 8. The discovery of the syntonic transference, and of the importance of analysing childhood -- 9. Countertransference, interaction and not knowing beforehand -- 10. Defences of the self, projective identification and identity -- 11. Christian experience, mysticism and the self -- 12. Synchronicity : an interpretation.
Sommario/riassunto	In the published work of Michael Fordham there has emerged a consistent and original contribution to Jungian thought, particularly in relation to the processes of individuation on childhood and the links between analytical psychology and the work of the Kleinians. In this addition to the "Makers of Modern Psychotherapy" series, the author takes a critical and informed look at Fordham's work and ideas. Illustrating theory with examples drawn from clinical practice, the book is intended to provide an amplification of Fordham's own work for

students of analytical psychology and an introduction to the subject for analysts interested in understanding the connections between post-Jungian and post-Kleinian thought.
