	Nota di contenuto	What is data and why should librarians be involved? -- Understanding research and the role of data -- Best practices for working with research data -- Data interviews -- Storing, curating, and preserving data -- Documentation and metadata -- Publishing and sharing data -- Writing data management plans -- Starting data management services -- Leveraging partnerships -- Expanding RDM service -- Teaching data -- Reusing data -- Data management roles for librarians.
	Sommario/riassunto	Data Management will guide readers through data management basics and best practices following through the data lifecycle. Guidance for starting and growing a data management service includes suggestions for assessment. Specifics about how to use the reference interview to help with data management, writing data management plans for grants, and finding collaborators are covered in depth. Specialty areas such as teaching data management and data reuse are also included.
