

1. Record Nr.	UNINA9910828078203321
Autore	Hirsch Edouard
Titolo	Generalized seizures : from clinical phenomenology to underlying systems and networks // Edouard Hirsch [and five others]
Pubbl/distr/stampa	Montrouge : , : John Libbey Eurotext, , [2006] ©2006
ISBN	2-7420-0879-9
Descrizione fisica	1 online resource (337 p.)
Collana	Progress in epileptic disorders, , 1777-4284 ; ; volume 2
Soggetti	Epilepsy - Research Convulsions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Generalized Seizures: From clinical phenomenology to underlying systems and networks""; ""Contents""; ""Foreword""; ""Workshop""; ""Section I: Generalized seizures and epilepsies: a bilateral a€œfocala€? dysfunction?""; ""What is a generalized seizure?""; ""What is Generalized Epilepsy?""; ""Section II : Tonic seizures and brainstem systems""; ""From brainstem to forebrain in generalized animal models of seizures and epilepsies""; ""Systems and network in tonic seizures and epilepsies in humans""; ""Comments from participants""; ""Comments from participants""</p> <p>""Section III: Absence seizures and cortico-thalamic systems""  Propagation and dynamic processing of cortical paroxysms in the basal ganglia networks during absence seizures""; ""Cortical control of absence seizures: focal initiation, spreading and modulation""; ""Systems and networks in absence seizures and epilepsies in humans""; ""Spike-wave seizures in corticothalamic systems""; ""Section IV: Myoclonic seizures and the frontal lobe""; ""Animal models of myoclonic seizures and epilepsies""; ""Systems and networks in myoclonic seizures and epilepsies""</p> <p>""Connections between primary reading epilepsy and Juvenile Myoclonic Epilepsy""""Section V: Primary versus Secondary Tonic-clonic seizures""; ""Behavior, neural circuits and plasticity in acute and chronic models of generalized tonic-clonic seizures""; ""The semiology and</p>

pathophysiology of the secondary generalized tonic-clonic seizures";  
""Tonic-clonic and clonic-tonic-clonic seizures in human primary  
generalized epilepsies"; ""Section VI: The a€œcorticala€? and a  
€œcentrencephalica€? theories revisited"; ""Cortical trigger in  
generalized seizures""

""Section VII: Phenomenology versus networks: clinical consequences""

Why can some antiepileptic drugs control certain types of seizures and  
aggravate others?"; ""Section VIII: Concluding remarks"; ""Can we  
replace the terms a€œfocala€? and a€œgeneralizeda€???""
