

1. Record Nr.	UNINA9910828085103321
Titolo	Landscapes on the edge : new horizons for research on Earth's surface // Committee on Challenges and Opportunities in Earth Surface Processes, Board on Earth Sciences and Resources, Division on Earth and Life Studies, National Research Council of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2010 ©2010
ISBN	0-309-15268-2 0-309-14025-0
Descrizione fisica	1 online resource (180 p.)
Disciplina	551.13072
Soggetti	Landscapes Land use Climatic changes Earth (Planet) Surface
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	The importance of Earth surface processes -- Grand challenges in Earth surface processes -- Four high-priority research initiatives in Earth surface processes -- Mechanisms for developing initiatives and sustaining growth in Earth surface processes.
Sommario/riassunto	"During geologic spans of time, Earth's shifting tectonic plates, atmosphere, freezing water, thawing ice, flowing rivers, and evolving life have shaped Earth's surface features. The resulting hills, mountains, valleys, and plains shelter ecosystems that interact with all life and provide a record of Earth surface processes that extend back through Earth's history. Despite rapidly growing scientific knowledge of Earth surface interactions, and the increasing availability of new monitoring technologies, there is still little understanding of how these processes generate and degrade landscapes. Landscapes on the Edge identifies nine grand challenges in this emerging field of study and proposes four high-priority research initiatives. The book poses questions about how

our planet's past can tell us about its future, how landscapes record climate and tectonics, and how Earth surface science can contribute to developing a sustainable living surface for future generations."--
