Sommario/riassunto

"Check out that baby bump!" Online and print magazines, television shows, and personal blogs are awash with gossip and speculation about pregnant celebrities. What drives our cultural obsession with celebrity baby bumps? *Pregnant with the Stars* examines the American fascination with, and judgment of, celebrity pregnancy, and exposes how our seemingly innocent interest in "baby bumps" actually reinforces troubling standards about femininity, race, and class, while increasing the surveillance and regulation of all women in our society. This book charts how the American understanding of pregnancy has evolved by examining pop culture coverage of the pregnant celebrity body. Investigating and comparing the media coverage of pregnant celebrities, including Jennifer Garner, Angelina Jolie, Beyoncé Knowles, Kristen Bell, M.I.A., Jodie Foster, and Mila Kunis, Renée Cramer shows us how women are categorized and defined by their pregnancies. Their stories provide a paparazzi-sized lens through which we can interpret a complex set of social and legal regulations of pregnant women. Cramer exposes how cultural ideas like the "rockin' post-baby body" are not only unattainable; they are a means of social control. Combining cultural and legal analysis, *Pregnant with the Stars* uncovers a world where pregnant celebrities are governed and controlled alongside the recent, and troubling, proliferation of restrictive laws aimed at women in the realm of reproductive justice and freedom. Cramer asks each reader and cultural consumer to recognize that the seeing, judging, and discussion of the "baby bump" isn't merely frivolous celebrity gossip—it is an act of surveillance, commodification, and control.

Sommario/riassunto	While the writings of early modern medical practitioners habitually touch on performance and ceremony, few illuminate them as clearly as the Protestant physicians Felix Platter and Thomas Platter the Younger, who studied in Montpellier and practiced in their birth town of Basle, or the Catholic physician Hippolytus Guarinonius, who was born in Trent, trained in Padua and practiced in Hall near Innsbruck. During his student years and brilliant career as early modern Basle's most distinguished municipal, court and academic physician, Felix Platter built up a wide network of private, religious and aristocratic patients. His published medical treatises and private journal record his professional encounters with them as a healer. They also offer numerous vivid accounts of theatrical events experienced by Platter as a scholar, student and gifted semi-professional musician, and during his Grand Tour and long medical career. Here Felix Platter's accounts, many unavailable in translation, are examined together with relevant extracts from the journals of his younger brother Thomas Platter, and

Guarinonius's medical and religious treatises. Thomas Platter is known to Shakespeare scholars as the Swiss Grand Tourist who recorded a 1599 London performance of Julius Caesar, and Guarinonius's descriptions of quack performances represent the earliest substantial written record of *commedia dell'arte* lazzi, or comic stage business. These three physicians' records of ceremony, festival, theatre, and marketplace diversions are examined in detail, with particular emphasis on the reactions of 'respectable' medical practitioners to healing performers and the performance of healing. Taken as a whole, their writings contribute to our understanding of many aspects of European theatrical culture and its complex interfaces with early modern healthcare: in carnival and other routine manifestations of the Christian festive year, in the extraordinary performance and ceremony of court festivals, and above all in the rarely welcomed intrusions of quacks and other itinerant performers.
