Sommario/riassunto

From grassroots conflicts to great power relations, this book explores some of the key concepts, methodologies, and dilemmas of researching Asia-Pacific affairs. The book deals with key questions about the Asia Pacific: Why should we study policy from the "ground up"? What are the human considerations for societies in conflict? Why is regionalism important and how do global powers play a role? Should Asia-Pacific researchers embrace the design-based revolution in the social sciences? *Muddy Boots and Smart Suits* is for students, scholars, and policymakers in the region looking for a new way to understand local, regional, and global security challenges.
