

1. Record Nr.	UNINA9910828254803321
Titolo	Metabolic acidosis // [editors, Ruth Porter, GERALYN LAWRENSON]
Pubbl/distr/stampa	London, : Pitman Summit, N.J., : distributed in North America by CIBA Pharmaceutical Co., 1982
ISBN	9786613694393 9781280784002 1280784008 9780470720691 0470720697 9780470718384 0470718382
Edizione	[1st ed.]
Descrizione fisica	1 online resource (406 pages)
Collana	Ciba Foundation symposium ; ; 87 (new ser.)
Altri autori (Persone)	PorterRuth CollinsGeraldyn M
Disciplina	616.3/99
Soggetti	Acidosis Metabolism - Disorders
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Symposium on Metabolic Acidosis, held at the Ciba Foundation, London, 12-14 May 1981.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Metabolic acidosis; Contents; The hydrogen ion in normal metabolism; Discussion; The techniques and uses of intracellular pH measurements; Discussion; Energy metabolism and cellular pH in normal and pathological conditions. A new look through ³¹ phosphorus nuclear magnetic resonance; Discussion; Acidosis and contractility of heart muscle; Discussion; Lactic acidosis in the brain: occurrence, triggering mechanisms and pathophysiological importance; Discussion; Glutamine metabolism in metabolic acidosis; Discussion; The regulation of ketogenesis; Discussion; General discussion I Fasting and ketone body metabolism Metabolic acidosis in exercise: (i) The fate of carboxylate ions during exercise; (ii) Clinical measurements of lactate loads; Preliminary observations on the metabolic responses to exercise in humans, using ³¹ phosphorus nuclear magnetic

resonance; Discussion; Metabolic acidosis and changes in water and electrolyte balance after maximal exercise; Some hormonal influences on glucose and ketone body metabolism in normal human subjects; Discussion; Effects of free fatty acids, insulin, glucagon and adrenaline on ketone body production in humans; Discussion
Quantitative aspects of L(+)-lactate metabolism in human beings
Discussion; The role of catecholamines in metabolic acidosis;
Discussion; Acid-base balance in diabetic ketoacidosis; Discussion;
Isotope turnover studies in uncontrolled diabetes and the effects of insulin; Discussion; Metabolic acidosis in the critically ill; Discussion;
The role of altered lactate kinetics in the pathogenesis of Type B lactic acidosis; Discussion; Organic acidurias: approach, results and clinical relevance; Discussion; Problems in the congenital lactic acidoses;
Discussion; GENERAL DISCUSSION II
Regulation of energy metabolism, gluconeogenesis and ketogenesis
The role of lactate in exercise; The relationship between intracellular and extracellular pH; Hormonal regulation of ketogenesis; Treatment of metabolic acidosis; Chairman's summary; Appendix; Index of contributors; Subject index

Sommario/riassunto

The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.
