families, and linguistic areas; Subject Index

Sommario/riassunto

The present volume examines the ways in which linguistic traits may change in a contact situation. It contains an encyclopaedic introduction, which sets out a general theory of contact-induced change, and twelve subsequent chapters, which analyse the effects of language contact on grammatical systems in a variety of languages belonging to different geographical areas and diverse types. - ;Languages can be similar in many ways - they can resemble each other in categories, constructions and meanings, and in the actual forms used to express these. A shared feature may be based on common genetic o
