Sommario/riassunto	This study analyzes the impacts of the financial crisis on power sectors in five countries in the region: Armenia, Kyrgyz Republic, Romania, Serbia and Ukraine. Before the financial crisis, these countries faced expected power shortages as a result of large investment gaps. With the financial crisis, GDP dropped, leading to a drop in demand for electricity. The drop in demand created a window of opportunity for meeting investment needs, but the crisis has limited the sources of financing available to the sector. In the post-crisis period, the study concludes that policymakers need to prioritiz
