Sommario/riassunto	This volume offers a comprehensive survey of the main periods, schools, and individual proponents of scepticism in the ancient Greek and Roman world. The contributors examine the major developments chronologically and historically, ranging from the early antecedents of scepticism to the Pyrrhonist tradition. They address the central philosophical and interpretive problems surrounding the sceptics' ideas on subjects including belief, action, and ethics. Finally, they explore the effects which these forms of scepticism had beyond the ancient period, and the ways in which ancient scepticism differs from scepticism as it has been understood since Descartes. The volume will serve as an

accessible and wide-ranging introduction to the subject for non-specialists, while also offering considerable depth and detail for more advanced readers.

Sommario/riassunto	This book develops an account of the parent-child relationship in order to articulate the essential structure of intersubjectivity as fundamentally ethically-oriented, dialogical, and mutually dynamic. Drawing on the philosophical projects of Maurice Merleau-Ponty and Emmanuel Levinas, as well as recent research in cognitive neuroscience and child development research, this work will be of interest to those working in the fields of continental philosophy, embodied cognition, philosophy of

childhood, psychoanalysis, psychology, philosophy for children (P4C),
and education.
