Nota di contenuto	An analytical framework for green growth -- Fostering environment-friendly behavioral change through market and non-market mechanisms -- Innovation and other industrial policies -- Human capital: implications of green growth policies for labor markets and job creation -- Natural capital -- Physical capital: the role of infrastructure in green growth strategies -- Crafting a green growth strategy.
Sommario/riassunto	As the global population heads toward 9 billion by 2050, decisions made today will lock countries into growth patterns that may or may not be sustainable in the future. Care must be taken to ensure that cities and roads, factories and farms are designed, managed, and regulated as efficiently as possible to wisely use natural resources while supporting the robust growth developing countries still need. Economic development during the next two decades cannot mirror the previous two: poverty reduction remains urgent but growth and equity can be pursued without relying on policies and practices th
