1. Record Nr. UNINA9910828500703321

Autore	Goswami D. Yogi
Titolo	Advances in Solar Energy, Volume 17
Pubbl/distr/stampa	London, GBR, : Earthscan, 2007
ISBN	1-317-74086-6 1-317-74087-4 1-315-79322-9 600-00-0134-7 1-4294-8004-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (337 p.)
Collana	Advances in solar energy ; ; 17
Disciplina	621.47
Soggetti	Solar energy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Half Title; Title Page; Copyright Page; Foreword; Table of Contents; List of figures and tables; About the authors; 1 Alternative World Energy Outlook 2006: A Possible Path towards a Sustainable Future; 1.1 Winds of Change: The Transition Period; 1.2. Future Availability of Fossil and Nuclear Energy Sources; 1.3 Alternative World Energy Scenarios; Notes and References; Annex I: Renewable Energy Potentials; Annex II: Simulation Parameters for Renewable Energy Scenarios; Annex III: Growing Share of Renewable Energy since 1990; 2 Quantum Well Solar Cells; 2.1 History 2.2 Quantum Well Electronic Structure2.3 Basic Operation of the P-I-N Quantum Well Solar Cell; 2.4 Near-term Applications for Quantum Well Solar Cells; 2.5 Efficiency Limits; 2.6 Conclusion; Acknowledgements; References; 3 Recent Progress of Organic Photovoltaics; 3.1 Introduction; 3.2 Organic versus Inorganic Semiconductors; 3.3 Organic/Polymeric Solar Cell Developments; 3.4 Organic Solar Cell Fabrications; 3.5 Organic Solar Cell Optimizations; 3.6 Conclusions and Future Perspectives; Acknowledgements; References 4 Thermal and Material Characterization of Immersed Heat Exchangers for Solar Domestic Hot Water4.1 Introduction; 4.2 Thermal Characterization and Design; 4.3 Mechanical Characterization of

Polymers; 4.4 Scaling of Candidate Polymers; 4.5 Conclusion; Acknowledgements; References; 5 Photocatalytic Detoxification of Water with Solar Energy; 5.1 Introduction; 5.2 Solar Collectors for Photochemistry; 5.3 Fundamental Parameters in Solar Photocatalysis; 5.4 Factors Affecting Solar Photocatalysis; 5.5 Solar UV Photocatalytic Degradation of Contaminants; 5.6 Evaluation of Solar UV Radiation
5.7 Installed Solar Photocatalytic Treatment Plants5.8 Photocatalytic Detoxification of Water with Solar Energy: Outlook for the Future; Acknowledgements; References; 6 Solar-Hydrogen: A Solid-State Chemistry Perspective; 6.1 Introduction; 6.2 Solar-Hydrogen; 6.3 The Concept of Solar-Hydrogen Generation; 6.4 Materials Property Requirements for Photo-Electrodes; 6.5 Electronic Structure; 6.6 Why Titania?; 6.7 Reduced-Band-Gap Titania; 6.8 Impact of Defect Chemistry on the Properties of Titania; 6.9 Collective and Local Factor; 6.10 Spin-off Applications of Titania
6.11 Multiphase Photo-Sensitive Systems6.12 Solar Cell Equipped with Space-Based Solar Energy Collector; 6.13 Solar-Oxygen; 6.14 Economic and Environmental Considerations of Solar-Hydrogen; 6.16 Solar-Methanol; 6.17 Conclusions; Notes; Acknowledgements; References; 7 Solar Heat for Industrial Processes; 7.1 Introduction; 7.2 Application Potential; 7.3 Available Solar Collector Technology; 7.4 Guidelines for Evaluation and System Design; 7.5 Case Studies; 7.6 Conclusions; References
8 Solar Energy Technology in the Middle East and North Africa (MENA) for Sustainable Energy, Water and Environment

Sommario/riassunto

'Essential for any serious technical library' PROFESSOR MARTIN GREEN, UNIVERSITY OF NEW SOUTHWALES, AUSTRALIA 'Valuable, detailed information that helps me plan for the future' DON OSBORN, FORMERLY OF SACRAMENTO MUNICIPAL UTILITY DISTRICT The Advances in Solar Energy series offers state-of-the-art information on all primary renewable energy technologies, including solar, wind and biomass, bringing together invited contributions from the foremost international experts in renewable energy. Spanning a broad range of technical subjects, this volume and series is a 'must-have' reference on global developments in the field of renewable energy. Volume 17 focuses primarily on solar energy, with respect to heating, hot water, drying and detoxification. Specific chapter subjects include: Alternative World Energy Outlook 2006: A Possible Path towards a Sustainable Future Quantum Well Solar Cells Recent Progress of Organic Photovoltaics Thermal and Material Characterization of Immersed Heat Exchangers for Solar Domestic Hot Water Photocatalytic Detoxification of Water with Solar Energy Solar-Hydrogen: A Solid-State Chemistry Perspective Solar Heat for Industrial Processes Solar Energy Technology in the Middle East and North Africa (MENA) for Sustainable Energy, Water and Environment
