Sommario/riassunto	The dynamics of Northeast Asia have traditionally been considered primarily in military and hard security terms or alternatively along their economic dimensions. This book argues that relations among the

states of Northeast Asia are far more comprehensible when the mutually shaping interactions between economics and security are considered simultaneously. It examines these interactions and some of the key empirical questions they pose, the answers to which have important lessons for international relations beyond Northeast Asia. Contributors to this volume analyze how the states of the regi
