

1. Record Nr.	UNINA9910828694303321
Titolo	Large Nc QCD 2004 : proceedings of the workshop, Trento, Italy, 5-11, 2004 // editors, J.L. Goity ... [et al.]
Pubbl/distr/stampa	Hackensack, N.J., : World Scientific, c2005
ISBN	1-281-89731-0 9786611897314 981-270-172-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (319 p.)
Altri autori (Persone)	GoityJose L
Disciplina	539.7/548
Soggetti	Quantum chromodynamics Baryons
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Prologue; List of Participants; Contents; Confinement at Large Nc G. 't Hooft; The First Thirty Years of Large N Gauge Theory Yu. Makeenko; Instantons and the Large Nc Limit, A.D. 2004 T. Schafer; Planar Equivalence: From Type 0 Strings to QCD A. Armoni, M. Shifman and G. Veneziano; Topological Defects in QCD at Large Baryon Density and/or Large Nc A . R. Zhitnitsky; Large N QCD from Superstrings J. G. Russo; A Holographic Dual of Large Nc QCD D. Mateos; Large-N Gauge Theories: Lattice Perspective and Conjectures M. Teper Large N QCD on the Lattice: A Review of Recent Results in the Fermionic Sector R. Narayanan and H. Neuberger Large Nc in Chiral Resonance Lagrangians R. Kaiser; Kaon Weak Interactions in Powers of 1/Nc S. Peris; The BK Kaon Parameter in the 1/Nc Expansion J. Prades, J. Bijnens and E. Gamiz; Baryons A . V. Manohar; 1/Nc Countings in Baryons: Mixings and Decays J. L. Goity; Baryon Vector- and Axial-Vector Currents in the 1/Nc Expansion R. Acosta and R. Flores-Mendieta; Baryon Resonances in the 1/Nc Expansion R. F. Lebed; Strong Decays of P-Wave Baryons in the 1/Nc Expansion N. N. Scoccola The [56,4+] Baryon Multiplet in the 1/Nc Expansion of QCD N . Matagne and Fl. Stancu Baryon Spectroscopy and Operator Construction in Lattice QCD D. G. Richards et al.; Instantons, Diquarks and Large N, Limit P. Faccioli, M. Cristoforetti and G. Ripka; Baryonic States in QCD

from Gauge/String Duality at Large Nc G. F. De Teramond and S. J. Brodsky; T-Odd Parton Distributions in Large Nc QCD P. V. Pobylitsa

Sommario/riassunto

The large Nc limit plays a fundamental role in the study of non-abelian gauge theories such as quantum chromodynamics (QCD). Since its discovery in 1974 by 't Hooft, the 1/Nc expansion has provided crucial insights into the non-perturbative aspects of gauge theories. The expansion implemented at the effective theory level is one of the fundamental tools currently in use in hadronic physics; there are important effects and relations that follow from the 1/Nc expansion, which held remarkably well in the real world with Nc = 3. The 1/Nc expansion also plays a central role in the recently discover
