Sommario/riassunto

Explorations of Consciousness in Contemporary Fiction is a collection of essays examining the potential of the contemporary English-language novel to represent and inquire into various aspects of the human mind. Grounded in contemporary literary theory as well as consciousness studies, the essays consider both narrative techniques by means of which writers attempt to render various states of consciousness (such as multimodality in digital fiction or experimental typography in post-traumatic narratives), and novelistic interpretations of issues currently being investigated by neurobiologists, cognitive scientists and philosophers of the mind (such as the adaptive value of consciousness or the process of self-integration by means of self-narration). The volume thus offers critical reflection upon the novel's cognitive accomplishment in this challenging area. Contributors are: Nathan D.
