1.

Record Nr.	UNINA9910828730003321
Titolo	Ontology learning and population : bridging the gap between text and knowledge / / edited by Paul Buitelaar and Philipp Cimiano
Pubbl/distr/stampa	Amsterdam, : Ios Press, 2008
ISBN	6611733558 1-281-73355-5 9786611733551 1-60750-296-8 600-00-0509-1 1-4337-1130-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (292 p.)
Collana	Frontiers in artificial intelligence and applications ; ; v. 167
Altri autori (Persone)	BuitelaarPaul CimianoPhilipp
Disciplina	006.33
Soggetti	Artificial intelligence Expert systems (Computer science) Information retrieval Knowledge acquisition (Expert systems) Machine learning Natural language processing (Computer science) Ontology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Title page; On the ""Ontology"" in Ontology Learning; Foreword; Contents; Extracting Terms and Synonyms; Taxonomy and Concept Learning; Learning Relations; Ontology Population; Methodology; Evaluation; Author Index
Sommario/riassunto	The promise of the Semantic Web is that future web pages will be annotated not only with bright colors and fancy fonts as they are now, but with annotation extracted from large domain ontologies that specify, to a computer in a way that it can exploit, what information is contained on the given web page. The presence of this information will allow software agents to examine pages and to make decisions about

content as humans are able to do now. The classic method of building an ontology is to gather a committee of experts in the domain to be modeled by the ontology, and to have this committee
