

1. Record Nr.	UNINA9910828739203321
Autore	Landragin Frederic
Titolo	Man-machine dialogue : design and challenges / / Frederic Landragin
Pubbl/distr/stampa	London, : ISTE Hoboken, N.J., : Wiley, c2013
ISBN	9781118578773 1118578775 9781118578681 1118578686 9781118578728 1118578724
Edizione	[1st ed.]
Descrizione fisica	1 online resource (224 p.)
Collana	Computer engineering series
Disciplina	620.82
Soggetti	Human-machine systems Interactive computer systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title Page; Contents; Preface; Introduction; Part 1: Historical and Methodological Landmarks; Chapter 1: An Assessment of the Evolution of Research and Systems; 1.1. A few essential historical landmarks; 1.1.1. First motivations, first written systems; 1.1.2. First oral and multimodal systems; 1.1.3. Current systems: multiplicity of fields and techniques; 1.2. A list of possible abilities for a current system; 1.2.1. Recording devices and their use; 1.2.2. Analysis and reasoning abilities; 1.2.3. System reaction types and their manifestation; 1.3. The current challenges 1.3.1. Adapting and integrating existing theories 1.3.2. Diversifying systems' abilities; 1.3.3. Rationalizing the design; 1.3.4. Facilitating the implementation; 1.4. Conclusion; Chapter 2: Man-Machine Dialogue Fields; 2.1. Cognitive aspects; 2.1.1. Perception, attention and memory; 2.1.2. Representation and reasoning; 2.1.3. Learning; 2.2. Linguistic aspects; 2.2.1. Levels of language analysis; 2.2.2. Automatic processing; 2.3. Computer aspects; 2.3.1. Data structures and digital resources; 2.3.2. Man-machine interfaces, plastic interfaces and

ergonomics; 2.4. Conclusion

Chapter 3: The Development Stages of a Dialogue System 3.1.

Comparing a few development progresses; 3.1.1. A scenario matching the 1980's; 3.1.2. A scenario matching the 2000's; 3.1.3. A scenario today; 3.2. Description of the main stages of development; 3.2.1.

Specifying the system's task and roles; 3.2.2. Specifying covered phenomena; 3.2.3. Carrying out experiments and corpus studies; 3.2.4. Specifying the processing processes; 3.2.5. Resource writing and development; 3.2.6. Assessment and scalability; 3.3. Conclusion;

Chapter 4: Reusable System Architectures; 4.1. Run-time architectures 4.1.1. A list of modules and resources 4.1.2. The process flow; 4.1.3.

Module interaction language; 4.2. Design-time architectures; 4.2.1.

Toolkits; 4.2.2. Middleware for man-machine interaction; 4.2.3.

Challenges; 4.3. Conclusion; Part 2: Inputs Processing; Chapter 5:

Semantic Analyses and Representations; 5.1. Language in dialogue and in man-machine dialogue; 5.1.1. The main characteristics of natural

language; 5.1.2. Oral and written languages; 5.1.3. Language and spontaneous dialogue; 5.1.4. Language and conversational gestures;

5.2. Computational processes: from the signal to the meaning

5.2.1. Syntactic analyses 5.2.2. Semantic and conceptual resources;

5.2.3. Semantic analyses; 5.3. Enriching meaning representation; 5.3.1.

At the level of linguistic utterance; 5.3.2. At the level of multimodal utterance; 5.4. Conclusion; Chapter 6: Reference Resolution; 6.1.

Object reference resolution; 6.1.1. Multimodal reference domains;

6.1.2. Visual scene analysis; 6.1.3. Pointing gesture analysis; 6.1.4.

Reference resolution depending on determination; 6.2. Action reference resolution; 6.2.1. Action reference and verbal semantics; 6.2.2.

Analyzing the utterance "put that there"

6.3. Anaphora and coreference processing

Sommario/riassunto

This book summarizes the main problems posed by the design of a man-machine dialogue system and offers ideas on how to continue along the path towards efficient, realistic and fluid communication between humans and machines. A culmination of ten years of research, it is based on the author's development, investigation and experimentation covering a multitude of fields, including artificial intelligence, automated language processing, man-machine interfaces and notably multimodal or multimedia interfaces. Contents Part 1. Historical and Methodological Landmarks
