

1. Record Nr.	UNINA9910828769303321
Autore	Barnett A. H (Anthony H.), <1951->
Titolo	New mechanisms in glucose control [[electronic resource] /] / Anthony H. Barnett, Jenny Grice
Pubbl/distr/stampa	Chichester, West Sussex, : Wiley-Blackwell, 2011
ISBN	1-118-68218-1 1-299-46883-7 1-118-68220-3
Descrizione fisica	1 online resource (74 p.)
Altri autori (Persone)	GriceJenny
Disciplina	616.4/624
Soggetti	Type 2 diabetes Hypoglycemic agents Obesity - Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Epidemiology and pathogenesis of type 2 diabetes -- Overview of current diabetes management -- The incretin system -- The incretin mimetics -- Dipeptidyl peptidase-4 inhibitors -- Sodium-glucose cotransporter-2 inhibitors -- Pipeline diabetes therapies -- Bariatric surgery for the treatment of type 2 diabetes -- Organization of diabetes care.
Sommario/riassunto	New Mechanisms in Glucose Control presents a clear overview of the new drugs and treatment therapies that have been developed in recent years to help improve glycaemic management for the diabetic patient, namely the incretin mimetics (GLP-1 agonists) and DPP-4 inhibitors. It also considers other drug classes currently in development and undergoing clinical trials including the SGLT2 inhibitors and other pipeline products. In addition to pharma cotherapeutic agents, the role of bariatric as a management tool for diabetes is covered as well as consideration of the organisation of diabete
