Sommario/riassunto	A financial system is only as strong as the governing practices and institutions of its participants. The challenge to build efficient and accountable financial institutions that promote confidence is a problem that private financial sector executives and policymakers confront together. In this context, Financial Sector Governance takes a clinical approach to addressing the challenges in emerging and developed markets in each industry: capital markets, private banks, state-owned banks, asset management companies, public pension funds, and mutual funds. It also explores the linkages between pub
