

1. Record Nr.	UNINA9910828841803321
Autore	Clifford Mark <1957->
Titolo	The greening of Asia [[electronic resource] ] : the business case for solving Asia's environmental emergency // Mark L. Clifford
Pubbl/distr/stampa	New York : , : Columbia University Press, , [2015] ©2015
ISBN	0-231-53920-7
Descrizione fisica	1 online resource (321 p.)
Collana	Columbia business school publishing
Disciplina	338.95/07
Soggetti	Sustainable development - Asia Environmental degradation - Asia Environmentalism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: green shoots under soot-stained skies -- Introduction: energy: sun, wind and the end of coal -- The sun kings -- Blowin' in the wind -- Introduction: our human world: cities, buildings, wheels -- Cities in a garden -- Buildings for a greener Asia -- Asia on the move: cars and trains -- Introduction: nature : forests, farms and water -- "Water is more important than oil" -- The tropical challenge : saving Asia's lungs -- Epilogue: "adhere and prosper" : from black coal to green power -- Conclusion -- Appendix: companies to watch -- Bibliography -- Index.
Sommario/riassunto	One of Asia's best-respected writers on business and economy, Hong Kong-based author Mark L. Clifford provides a behind-the-scenes look at what companies in China, India, Japan, Korea, the Philippines, Indonesia, Hong Kong, Singapore, and Thailand are doing to build businesses that will lessen the environmental impact of Asia's extraordinary economic growth. Dirty air, foul water, and hellishly overcrowded cities are threatening to choke the region's impressive prosperity. Recognizing a business opportunity in solving social problems, Asian businesses have developed innovative responses to the region's environmental crises. From solar and wind power technologies to green buildings, electric cars, water services, and

sustainable tropical forestry, Asian corporations are upending old business models in their home countries and throughout the world. Companies have the money, the technology, and the people to act-yet, as Clifford emphasizes, support from the government (in the form of more effective, market-friendly policies) and the engagement of civil society are crucial for a region-wide shift to greener business practices. Clifford paints detailed profiles of what some of these companies are doing and includes a unique appendix that encapsulates the environmental business practices of more than fifty companies mentioned in the book.
