

1. Record Nr.	UNINA9910828946403321
Autore	Clarke Catherine A. M.
Titolo	Medieval Cityscapes Today // Catherine A.M. Clarke [[electronic resource]]
Pubbl/distr/stampa	Leeds : , : ARC Humanities Press, , 2019
ISBN	1-64189-114-9 1-64189-915-8 1-64189-113-0
Descrizione fisica	1 online resource (x, 109 pages) : digital, PDF file(s)
Collana	Past imperfect
Disciplina	307.760902
Soggetti	Cities and towns, Medieval Civilization, Medieval City and town life - History - To 1500 Historic sites - Interpretive programs History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 20 Nov 2020).
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Contents -- List of Illustrations -- Preface -- Acknowledgements -- Rouen: Introduction -- Chapter 1. Chester: The Medieval City and Other Monsters -- Chapter 2. Swansea: Seeing the Invisible City- Spatial Encounters Past and Present -- Winchester: After word -- Further Reading
Sommario/riassunto	This book explores medieval cityscapes within the modern urban environment, using place as a catalyst to forge connections between past and present, and investigating timely questions concerning theoretical approaches to medieval urban heritage, as well as the presentation and interpretation of that heritage for public audiences. Written by a specialist in literary and cultural history with substantial experience of multi-disciplinary research into medieval towns, 'Medieval Cityscapes Today' teases out stories and strata of meaning from the urban landscape, bringing techniques of close reading to the material fabric of the city, as well as textual artefacts associated with it.

Autore	Sing Swee Leong
Titolo	Process-Structure-Properties in Polymer Additive Manufacturing II
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (182 p.)
Soggetti	History of engineering and technology Materials science Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Additive manufacturing (AM) methods have grown and evolved rapidly in recent years. AM for polymers is particularly exciting and has great potential in transformative and translational research in many fields, such as biomedicine, aerospace, and even electronics. The current methods for polymer AM include material extrusion, material jetting, vat polymerization, and powder bed fusion. In this Special Issue, state-of-the-art reviews and current research results, which focus on the process-structure-properties relationships in polymer additive manufacturing, are reported. These include, but are not limited to, assessing the effect of process parameters, post-processing, and characterization techniques.
