Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Issued as part of book collections on Project MUSE.
Nota di contenuto	1. Denial is the killer -- 2. Learned predators and unsuspecting preys -- 3. The boy and the monkey.
Sommario/riassunto	There is no denying the havoc HIV/AIDS has wrecked around the globe. The worst impact is seen in the developing world and in impoverished communities in the developed world. However, being HIV positive is not a death sentence. Why then do many still die from it? Denial is the Killer is a fictionalisation of the reality on why and how the persisting vestiges of HIV/AIDS devastation can be stopped.
