

1. Record Nr.	UNINA9910828975603321
Titolo	Volatile organic compounds [[electronic resource] /] / Jonathan C. Hanks and Sara O. Louglin, editors
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2011
ISBN	1-62257-131-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (200 p.)
Collana	Environmental science, engineering and technology
Altri autori (Persone)	HanksJonathan C LouglinSara O
Disciplina	628.5/2
Soggetti	Volatile organic compounds - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- VOLATILE ORGANIC COMPOUNDS -- VOLATILE ORGANIC COMPOUNDS -- Contents -- Preface -- Reductive Degradation of Volatile Organic Compounds by Iron-Bearing Soil Minerals and Phyllosilicates -- Abstract -- I. Introduction -- II. Materials and Methods -- II.1. Chemicals -- II.2. Description of Experimental Procedures -- II.2.1. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Iron Bearing Soil Minerals and Phyllosilicates -- II.2.2. Effect of Transition Metal on Degradation of Chlorinated Organic Compounds by Iron-Bearing Soil Minerals -- II.3. Description of Analytical Procedures -- II.3.1. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Iron Bearing Soil Minerals and Phyllosilicates -- II.3.2. Effect of Transition Metal on Degradation of Chlorinated Organic Compounds by Iron-Bearing Soil Minerals -- III. Results and Discussion -- III.1. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Iron Bearing Soil Minerals and Phyllosilicates -- III.1.1. Treatment of Kinetic Data -- III.1.2. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Pyrite -- III.1.3. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Magnetite -- III.1.4. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Green Rust -- III.1.5. Abiotic Reductive Dechlorination of Chlorinated Ethylenes by Iron Bearing Phyllosilicate (Biotite, Vermiculite, and Momtmorillonite) -- III.2. Effect of Transition Metal on Degradation of Chlorinated Organic Compounds by Iron-Bearing Soil Minerals -- III.2.1. Dechlorination of

Chlorinated Compounds by FeS with Transition Metal -- III.2.2.
Dechlorination of PCE by Green Rusts with Platinum -- IV.
Environmental Significance -- Acknowledgments -- References.
Photocatalytic Degradation of VOC Gases Considering Reactor Design
for the Treatment of Decomposition Intermediates Using a Short
Wavelength UV Light and Water Droplets -- Abstract -- 1. Introduction
-- 2. Experimental and Methods -- 2.1. Application of UV254+185nm
Irradiation to the VOC Degradation using TiO₂ Photocatalyst -- 2.1.1.
Photoreactor and UV Sources -- 2.1.2. Catalyst Preparation -- 2.1.3.
Experimental Procedure and Conditions -- 2.1.4. Analytical Methods --
2.2. Application of an Air Washer with UV254+185nm/TiO₂
Photocatalytic Reaction for VOC Degradation -- 2.2.1. Photoreactor and
UV Sources -- 2.2.2. Experimental Procedure and Conditions -- 2.2.3.
Analytical Methods -- 2.3. Degradation of Organic Gases Using
Ultrasonic Mist Generated from TiO₂ Suspension -- 2.3.1. Generation
of Ultrasonic Mist Containing Photocatalyst Particles (UMP) -- 2.3.2.
Degradation of Organic Gases -- 2.3.3. Analytical Methods -- 3.
Results and Discussions -- 3.1. Application of UV254+185nm
Irradiation to the VOC Degradation using TiO₂ Photocatalyst -- 3.1.1.
Photochemical and Photocatalytic Degradation of Gaseous Toluene by
TiO₂ Catalyst with UV254+185nm Irradiation -- 3.1.2.
Photodegradation of Gaseous Toluene by Irradiation of Different UV
Sources in Presence of TiO₂ Catalyst -- 1) Comparison of Conversion,
Mineralization and Generation of Harmful Intermediates -- 2)
Comparison of the Effect of Initial Concentration -- 3) Comparison of
Catalyst Deactivation and Regeneration -- 3.1.3. Formation and
Treatment of By-products -- 3.2. Application of an Air Washer with
UV254+185nm/TiO₂ Photocatalytic Reaction for VOC Degradation --
3.2.1. Trapping Efficiency of the Air Washer -- 3.2.2. Photodegradation
of NO_x and Toluene with UV254+185nm Irradiation and the Water
Solubility of Decomposition Products.
3.2.3. Treatment of NO_x and Toluene with the UV254+185nm
Irradiation System and the Air Washer -- 3.2.4. Evaluation of TiO₂
Activity under UV254+185nm Irradiation -- 3.3. Degradation of
Organic Gases Using Ultrasonic Mist Generated from TiO₂ Suspension
-- 3.3.1. Toluene Gas Removal -- 1) Photocatalytic Degradation -- 2)
Effects of UV Wavelength -- 3) Trapping of Decomposition
Intermediates -- 3.3.2. Effect of Various Organic Gases on Removal and
Mineralization -- 3.3.3. Size Distribution of UMP -- 3.3.4. Degradation
Mechanism for Organic Gases on UMP Surface -- Conclusions --
References -- Catalytic Incineration of Volatile Organic Compounds --
Abstract -- Introduction -- 2. The Preparation of Catalysts -- 2.1.
Catalyst Materials -- 2.2. Carriers -- 2.3. Making the Finished Catalyst
-- 2.4. Drying -- 2.5. Calcination and Activation -- 3. Effect of
Operating Parameters -- 3.1. Catalyst Type -- 3.2. VOCs Type -- 3.3.
Reaction Temperature -- 3.4. VOCs Concentration -- 3.5. Space
Velocity -- 3.6. O₂ Concentration -- 4. Poisoning -- 5. Kinetic Study
-- 5.1. Differential Reactor Operation -- 5.2. Power-rate Law -- 5.3.
Mars and van Krevelen Model -- 5.4. Langmuir-Hinshelwood Model --
5.5. Verification of the Kinetic Model -- References -- Transport of
VOCs in Polymers -- 1. Abstract -- 2. Transport through Polymer
Membranes -- 2.1. Permeability of Polymer Membranes -- 2.2.
Diffusion in Polymer Membranes -- 2.3. Sorption in Polymer
Membranes -- 2.4. Dependence of Transport Parameters on
Temperature -- 2.5. Correlation of Transport Parameters with
Thermodynamic Critical Quantities -- 3. Experimental Methods for
Determination of Vapour Transport in Polymers -- 3.1. Time-Lag
Permeation -- 3.2. Differential Permeation Method -- 3.3. Gravimetric

Sorption Method -- 3.4. Pervaporation -- Conclusion --
Acknowledgments -- References.
Sources and Elimination of Volatile Organic Compounds -- Abstract --
Introduction -- Effects on Environment and Health -- The
Photochemical Smog -- Indoor Pollution -- Methods of Reduction and
Treatments of VOCs Emissions -- Primary Techniques -- Secondary
Techniques -- Recovery Technologies -- Adsorption -- Condensation
-- Separation by Membrane -- Destruction Technologies -- Bio-
filtration -- Incineration or Oxidation -- References -- In-Vivo Analysis
of Palm Wine (*Elaeis Guineensis*) Volatile Organic Compounds (VOCs)
by Proton Transfer Reaction-Mass Spectrometry -- Abstract --
Introduction -- 2. Materials and Methods -- 2.1. Materials -- 2.2.
Panelists -- 2.3. Proton Transfer Reaction- Mass Spectrometry of Palm
Wine -- 2.4. PTR-MS of Pure Volatile Organic Compounds (VOCs) --
2.5. In Vivo Flavor Release Analysis -- 2.6. PTR-MS Data Analysis -- 3.
Results and Discussion -- 3.1. Fragmentation Patterns in Palm Wine --
3.2. PTR-MS Headspace of Palm Wine -- 3.3. The In - Mouth Situation
-- Conclusion -- References -- Index.
