Sommario/riassunto	"The Arabian Gulf is now involved in a massive arms race, triggered largely by the fear that Iran will try to use its military forces to intimidate or dominate its neighbors. Iran has threatened to close the Gulf and carried out a wide range of large military exercises to show its capabilities. And Iran has steadily increased its ability to exploit the threat of conventional and asymmetric warfare to maritime traffic in the Gulf. The buildup of Iran's naval, air, and missile capabilities poses a

wide range of threats to maritime traffic into and outside of the Gulf. One potential target of this threat is the steady increase in bulk cargo shipments into the Gulf, Arabia Sea/Gulf of Oman, and Red Seas -- shipments that are of steadily growing strategic importance to each of the other the Gulf states"--Publisher's web site.

Sommario/riassunto	This is a book for reference and revision, especially for those in the early stages of studying the Persian language. It uses the official reformed spelling, and gives attention to handwriting, educated standard and educated colloquial pronunciation, and the important polite forms. The grammar is explained with copious examples, all

shown both in Persian script and in Roman transliteration. The grammatical themes are grouped logically, and there are cross-references, appendices and a subject index to facilitate the search for the right form.
