Soggetti	Hellenism in literature Literary criticism Criticism, interpretation, etc. Greece In literature Greece
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Ancient Greek history holds a special place in the works of many 19th-c. writers. The same goes for Cyprian Norwid, one of the most eminent poets in the history of Polish literature, a thinker, and an artist. This book scrutinizes Norwid's fascination with Greek history and culture, especially his peculiar synthesis of Greek thought and Christianity. It focuses on the key themes of the relationship of Platonism with early Christian writings and their presence in Norwid's contemporary culture, the opposition of memory and history in 19th-c. literature and social life, and the image of the artist and its influence on social life in modern everyday. The book analyzes Norwid's oeuvre in a broad comparison with representatives of French, German, and British literature and the humanities.

2. Record Nr.	UNINA9910829025103321
Autore	Rubei Elena
Titolo	Algebraic geometry : a concise dictionary // Elena Rubei
Pubbl/distr/stampa	Berlin, [Germany] ; ; Boston, [Massachusetts] : , : De Gruyter, , 2014 ©2014
ISBN	3-11-037088-3
Descrizione fisica	1 online resource (240 p.)
Classificazione	SK 240
Disciplina	516.3/503
Soggetti	Geometry, Algebraic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front matter -- Preface -- Notation -- Bibliography -- List Of Terms
Sommario/riassunto	Algebraic geometry is one of the most classic subjects of university research in mathematics. It has a very complicated language that makes life very difficult for beginners. This book is a little dictionary of algebraic geometry: for every of the most common words in algebraic geometry, it contains its definition, several references and the statements of the main theorems about that term (without their proofs). Also some terms of other subjects, close to algebraic geometry, have been included. It was born to help beginners that know some basic facts of algebraic geometry, but not every basic fact, to follow seminars and to read papers, by providing them with basic definitions and statements. The form of a dictionary makes it very easy and quick to consult.
