

1. Record Nr.	UNINA9910829038003321
Titolo	Improving health through nursing research [[electronic resource] /] / edited by William L. Holzemer
Pubbl/distr/stampa	Chichester, West Sussex, UK ; ; Ames, Iowa, USA, : Blackwell Pub. [Geneva, Switzerland] : International Council for Nurses, 2009
ISBN	1-282-29199-8 9786612291999 1-4443-0997-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (274 p.)
Altri autori (Persone)	HolzemerWilliam L
Disciplina	610.73072
Soggetti	Nursing - Research Evidence-based nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	International Council of NursesImproving Health throughNursing Research; Contents; List of Contributors; Acknowledgments; Preface; Part 1Nursing science and global health; Chapter 1Global perspectives on health and nursing; Introduction; Global priorities for health; Health systems and the health care workforce; International organizations and development aid; Conclusions; Notes; Chapter 2Building knowledge; Knowledge development in science; Modern philosophy and its influence on science; Twentieth century philosophy of science; Postmodern philosophy's influence on nursing science ConclusionsReferences; Chapter 3Theory and nursing science; Introduction; Types of theory; Components of theory; Nursing definitions and theory; Conclusions; Note; References; Part 2Nursing research: making a differencein people's lives; Chapter 4Improving patient care; Introduction; Nursing research and clinical practice; Symptom management; Disease prevention; End-of-life care; Pain management; Conclusions; References; Chapter 5Enhancing care delivery; Introduction; The nurse supply; Measuring performance, productivity, and value; Determining the right provider mix; Cost-effectiveness

Care quality and safety
Conclusions; Notes; References; Chapter 6
Building professional nursing; Introduction; From early industrialization to market domination; Building the nursing profession; Autonomy through knowledge, self-regulation, and affiliation; Building the profession globally; A new nursing globalism; Conclusions; References; Chapter 7
Defining the research problem; Identifying problems for research; Sources of problems; Conducting a literature review; Conclusions; Notes; References; Part 3
Quantitative research; Chapter 8
Introduction to quantitative research; Introduction; Variables Principles of causality
Randomization; Co-variates: confounding or modifying?; Parametric and non-parametric analytical methods; Research designs; Summary; References; Chapter 9
Sampling; Introduction; Types of sampling; Sampling error; Estimating sample size; Sample loss; Random selection of subjects; Summary; References; Chapter 10
Selecting instruments for research; Introduction; Selecting or developing an instrument; Standardized instruments; Cultural comparability; Instrument translation; Assessing available tools; Summary; References; Chapter 11
Experimental research designs
Randomized controlled trials
Hypothesis testing; Other research designs; Threats to design validity; Summary; References; Chapter 12
Research critique; Introduction; Substruction; A substruction example; Substruction limitations; Outcomes Model for Health Care Research; Conclusions; Note; References; Chapter 13
Preparing data for analysis; Introduction; Developing and storing data; Developing a code book; Missing data; Cleaning data to ascertain accuracy; Instrument scoring; Assessing normal distribution; Longitudinal intervention studies; Preliminary data analysis; Conclusions; Resources
Part 4
Qualitative research

Sommario/riassunto

Improving Health through Nursing Research is a practical guide to research and research utilisation in nursing. The book draws upon international expertise in nursing research, reflecting the worldwide demand for evidence-based practice. Part one offers a global perspective on health and nursing and addresses the development of nursing knowledge and nursing theory. Part two investigates the underlying need for nursing research, focusing on improving patient care, enhancing care delivery and developing the profession of nursing. Parts three and four provide an overview of quantitat
