| Sommario/riassunto | The mental health needs of older people are all too often overlooked or |

put down to the inevitable consequences of ageing. This textbook will make it much easier for health, social care and third sector workers to identify, treat and support the needs of this population. The book takes an interdisciplinary team approach and sets the scene by looking at different practice contexts in the United Kingdom and the increasingly important role played by social care in addressing the mental health needs of older people. A number of more clinically focused chapters then cover: m
