Sommario/riassunto	In this book, Paul Clarke argues that in order to live sustainably we need to learn how to live and flourish in our environment in a manner that uses finite resources with ecologically informed discretion. Education is perfectly placed to create the conditions for innovative and imaginative solutions and to provide the formulas that ensure that everyone becomes naturally smart; but to achieve this, we need to recognise that an education that is not grounded in a full

understanding of our relationship with the natural world is no
education at all. In other words, a total transformation of sc
