

1. Record Nr.	UNINA9910829111903321
Autore	Askari Arman T
Titolo	Management strategies in antithrombotic therapy // by Arman Askari and Adrian W. Messerli
Pubbl/distr/stampa	Chichester ; ; Hoboken, N.J., : John Wiley and Sons, c2007
ISBN	1-282-34825-6 9786612348259 0-470-51813-8 0-470-51814-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (372 p.)
Altri autori (Persone)	MesserliAdrian W
Disciplina	616.1/42
Soggetti	Thrombolytic therapy Thrombosis - Treatment Fibrinolytic agents
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Thrombosis and antithrombotics in vascular disease -- Aspirin -- Thienopyridines, ticlopidine, and clopidogrel -- Platelet glycoprotein IIb/IIIa inhibitors -- Unfractionated heparin -- Low-molecular-weight heparins -- Direct thrombin inhibitors -- Fibrinolytic agents -- Acute ST-segment elevation myocardial infarction -- Acute coronary syndromes / non-ST-segment elevation myocardial infarction -- Anticoagulation strategies for patients undergoing percutaneous coronary intervention -- Venous thromboembolic disease -- Heparin-induced thrombocytopenia.
Sommario/riassunto	Intravascular thrombus formation remains one of the most significant problems in cardiovascular medicine. It underlies the clinical presentation of acute coronary syndromes, including unstable angina and non-ST-segment elevation myocardial infarction (NSTEMI) and ST-segment elevation myocardial infarction. More and more individuals are stricken with an acute MI and undergo a percutaneous coronary intervention (PCI). Several reasons apply, including an increasingly aged population, the growing burden of chronic risk factors such as diabetes, obesity, sedentary behaviour, and improvements in e
